38 Facts & Figures
Shalom to all and greetings from Haifa,

A few months ago I came back home! After over a decade of living in the US, serving as Senior Vice Provost at NYU, I returned to beautiful Haifa, and more importantly, to my first academic home, the University of Haifa.

I have a great love for this institution of higher learning, so different from any other in the Israeli higher education system. As President of the University it is my mission to make the University flourish, develop and grow. A University is a dynamic entity, by its very definition, it is adaptive and ever-changing. In this day and age, even more so. One of the great challenges ahead of us is to encourage pluralism maintaining the highest research standards; a place where Israelis from all walks of life can come together in the pursuit of knowledge and science. I believe that a university should be a living image of its human environment and in our case, I am proud to state, we indeed are a reflection of Israeli society, and an inspiration of what Israel is, but also what it should be.

My team and I have great plans for the coming years and the wheels have already started turning for this engine of growth and development. We intend to add two excellent colleges to the University, each a leader in its field, thus expanding the University of Haifa’s portfolio. The Braude College of Engineering in Karmiel is an established college in northern Israel with strong ties with industry. By adding it to the University’s portfolio we shall be attaining a School of Engineering as well as acquiring a vibrant campus in the Galilee. The NB Haifa School of Design, located in Haifa, is well known for its excellence in design and architecture. By bringing it into the fold of the university we are not only adding exciting new fields of study and research to our portfolio; we are also gaining a foothold in downtown Haifa where the College is located.

We intend also to develop on major research collaborations in Israel and abroad. We are planning a major partnership with Rambam Hospital in Haifa and in fact we will move some of our relevant medical ventures to the Rambam campus to establish a presence there. The City of Haifa is becoming the Biomedical capital of Israel and we intend to make certain that the University will become a major player in the field. Furthermore, we shall continue our collaborations in China in the spirit of the already existing partnership with ECNU (East China Normal University) as this is of strategic importance not only for the University, but to the State of Israel.

This is just the beginning of the transformation of the University of Haifa into an international ‘Multiversity’. I invite each and every one of you to join us and be part of this magical journey.

With my warmest regards,

Prof. Ron Robin
President
Chairman of the Board of Governors
Prof. Alfred Tauber

Prof. Tauber and his wife, the historian Paula Fredriksen, made aliyah in 2011. They divide the year between Jerusalem and their farm in central New Hampshire, where they established The Avaloch Farm Music Institute, a residence for professional classical chamber musicians.

Chairman of the Executive Committee
Shmuel (Mooly) Eden

With his sister, Ingrid Tauber, Prof. Tauber directs the Tauber Family Foundation, which funds programs in Israel and the United States for the care and rehabilitation of the mentally ill. The Israeli Health Ministry has recognized and co-sponsored active partnerships with the Tauber Foundation in educational and research programs at the University of Haifa. In addition, Prof. Tauber established the Tauber Bioinformatics Center at the University for the development of new methods in genomics and proteomics.

President
Prof. Ron Robin

Prof. Ron Robin assumed his role as the 11th president of the University of Haifa in October 2016. He graduated from the Hebrew University with a degree in History and Romance Languages, followed by a Ph.D in U.S. History from the University of California at Berkeley (1986). Prof. Robin was a faculty member at the University of Haifa for over twenty years, during which he held several leadership positions, including Dean of Students. In 2006, Prof. Robin joined New York University where, amongst other duties, he served as the Senior Vice Provost and was responsible for establishing two NYU international campuses—in Abu Dhabi and Shanghai.

Under his leadership, the University of Haifa will focus on global interdisciplinary research in collaboration with leading international research institutions. Interdisciplinarity will allow the University to create new nodes knowledge under the auspices of joint, innovative and unexpected "umbrellas."

Prof. Robin believes that the University's role is to provide its graduates with tools based on critical thinking, theory and reasoning—both quantitative and qualitative— in preparation for leadership positions in Israeli society.

Chairman of the Executive Committee
Shmuel (Mooly) Eden

In 2012 Eden was voted by Forbes magazine as one of the top 10 most brilliant technological minds in the world alongside the CEO of Amazon and Apple's chief designer.

Prof. Robin believes that the University’s role is to provide its graduates with tools based on critical thinking, theory and reasoning—both quantitative and qualitative— in preparation for leadership positions in Israeli society.

The Faculty of Education at the University of Haifa is the leading academic institution in Israel dedicated to research and teaching in the human sciences at the highest international level that can be applied to educational policy and practice. We believe that education has the power to transform human lives. Our mission is to prepare a new generation of educational practitioners and thought leaders for Israeli society and beyond through the advancement of scholarship, instruction, and training in the learning and related sciences, the innovation of cutting-edge pedagogies and instructional technologies, and the development of new diagnostic techniques and evaluation tools. The Faculty’s researchers partner with students to realize their potential, taking into consideration the diverse social and ethnic spectrum of Israeli society in order to forge the future of Israeli education.

Over 60 researchers offer undergraduate and graduate studies to over 2000 students through the Faculty’s six academic departments in some 27 disciplines ranging from the brain and learning, technologies in education and alternative educational approaches, to educational evaluation and educational leadership and policy.

The Faculty supports 23 research laboratories, centers, and institutes where research projects are undertaken by members of the Faculty. These include: The Israeli Center of Research Excellence (I-CORE) LINKS, The Edmond J. Safra Brain Research Center for the Study of Learning Disabilities, The Center for Jewish Education, and two National Centers for Elementary and High School Mathematics Teachers.

“The University of Haifa accepts students from different countries and various ethnicities. We study, communicate and discuss in the same environment. In my opinion, it will be a chance for Chinese education going global and bringing international education into China.”

Wu Xu Fan, China, Education Internship Summer Course
The Humanities are the bedrock of higher education. The Faculty of Humanities is concerned with human culture, the past, present and future of human society, the spirit of man, and the various forms of its expression in fields including, history, philosophical thought, literature, linguistics and the arts. Alongside these universal fields of study, the Faculty’s offerings place a special emphasis on basic elements of Judaism including, the history of the Jewish people, Jewish culture, Land of Israel Studies and archaeology topics that reflect local aspects of the humanities. Due to the breadth of our academic offerings, the Faculty of Humanities is the largest academic unit at the University of Haifa, with 23 departments and programs.
We take pride in being the most dynamic and innovative law faculty in Israel that is internationally renowned for its path-breaking scholarship in various facets of law. Legal settings cannot be fully understood, analyzed and evaluated only ‘from within’, but must also face questions of values and realities - economic, social, political, international, and cultural. We believe that law practitioners can only benefit from having these additional dimensions in their studies and work. Indeed, our graduates have been placed in top leading law firms and public institutions, as well as senior research and teaching positions in academia.
Our youngest faculty is characterized by a strong spirit of curiosity and daring in the fields of life sciences, mathematics, marine studies, and science education. Our goal in embracing ambitious initiatives is to expose gifted budding scientists, researchers, and teachers to innovative thinking, as they search for personal excellence.

Students can specialize in neurobiology, the study of nerve cells and tissue function levels in the brain.

One of the areas that the Department of Evolutionary and Environmental Biology focuses on is organismal responses to environmental challenges. Our students investigate the interrelationships between plants and animals, seeking ways to preserve and sustain nature and examine the processes that were involved in evolutionary terms. Attention is given to temporal changes in the environment and their possible impact on our health.
The Herta and Paul Amir Faculty of Social Sciences

The future direction of society relies greatly on our understanding of how we interact with one another and what drives societal change. How organizations and communities affect the way that people live and work, how societies influence states, and how multiple factors influence individual behavior all require basic research.

The Herta and Paul Amir Faculty of Social Sciences approaches these issues with multidisciplinary curricula that are designed for three degree levels: BA and BSc, MA and MSc, and PhD. The Faculty comprises some 6,000 students and 160 full-time academic staff in 13 academic units: Psychology, Economics, Political Sciences (including Government, International Relations and Public Administration), Geography and Environmental Studies, Communication, Sociology, Anthropology, Criminology, Statistics, Information Systems, Computer Science, Child Development and Peace and Conflict Management.
Our Faculty offers outstanding opportunities for study, professional growth, research, collaboration, and community development in the fields of health care and social care. Our mission is to provide aspiring professionals with innovative academic pathways that follow a strong vocational theme and will help them deliver a higher quality of life to Israel’s growing population, particularly in the north of the country.

“The program has been very challenging but also very rewarding. The experience I gained through the field training we go through has helped me gain lot of knowledge that I wouldn't have gained otherwise.”

Megan Van Beuge, USA, MA in Art Therapy
“I heard great things about the faculty, but I wasn’t sure what the atmosphere would be like. Turned out it’s really collaborative. We’re like this big team, we’re like a family.

Natalie Barak, USA, International MBA - Faculty of Management, Department of Business Administration

The University of Haifa’s Faculty of Management aims to be at the leading edge of teaching and academic research that is relevant to a broad range of Israeli industries and business sectors in the global environment. Founded in 1996, the Faculty takes pride in its high-quality, innovative educational programs, intensive academic research activities through its four research centers, and its involvement in Israeli society and the economy. The Faculty’s three departments offer various MBA, MA, and PhD programs in management, placing exceptional emphasis on building bridges between academia and industry.

The courses provide prime opportunities for students to meet leading Israeli executives, to listen and learn their best practices and examine how they cope in an active business environment. Our International MBA Program focuses on doing business in Asia, integrating multiple methods of learning that include mixed Israeli-Chinese student teams working together on problem-solving for business projects.
Recent discoveries of huge reserves of natural gas in the Mediterranean Sea off the coast of Israel, estimated at 2 percent of the world’s global natural gas reserves, have catapulted the Mediterranean Sea into the international spotlight and onto Israel’s national agenda. The Israeli Exclusive Economy Zone (EEZ) is larger than the entire onshore area of Israel and holds an important key to Israel’s future.

The Leon H. Charney School of Marine Sciences (CSMS) is a unique initiative that applies an interdisciplinary approach and operates on a global scale. The School offers graduate studies (MA, MSc, and PhD) for both Israeli and international students.
The International School serves as the focal point for the University’s ongoing process of internationalization. The International School has been host to students from over forty countries, who have come to Haifa to participate in our graduate programs, semester and year programs for undergraduates, and intensive Hebrew and Arabic courses.

Guided by the principles of academic excellence, cultural immersion and a caring community, the International School provides a challenging academic environment for its students. A range of activities introduces them to a dynamic social and cultural mosaic on campus and assures that students actively experience Israeli life.

International MA Programs
- Art Therapy
- Child Development
- Diplomacy Studies
- Dual-Degree in International Relations with Warsaw University
- German and European Studies
- Global Green MBA
- Global Health Leadership & Administration (MPH)
- The Weiss-Livnat International MA in Holocaust Studies
- International MBA
- Israel Studies
- Jewish Studies
- Marine Geosciences (MSc)
- Maritime Civilizations
- National Security Studies
- Peace and Conflict Management Studies
- Prehistoric Archaeology
- Social Work

Semester and Year Study Abroad Programs
- Intensive Hebrew and Arabic Summer and Winter Courses
- Internship Program
- Israeli Student Exchange Programs
- Summer Courses

The University has launched 13 one-year and 4 extended full degree international graduate programs taught in English. This year we are proud to offer 17 different international MA programs, each one housed in the respective faculty or department, with the help of the International School providing the administrative and co-curricular support system for international students. These programs are set up to enable international and Israeli students to share courses and become an intertwined part of the social mosaic of our University. The International School semester and year-long study abroad programs attract undergraduate students from all over the world, who can choose from a variety of courses taught in English in the International School, such as Contemporary Israel, Jewish and Religious Studies, Arab Language and Culture, Business, Psychology, and others.

“The International School is just one big happy family and it is my home away from home.”
Oluwafumike Abisoy, Fall 2015

Vice Rector and Head of the International School
Prof. Gad Barzilai
+972-4-8288464
gbarzilai@univ.haifa.ac.il
The focus of graduate studies has shifted significantly in recent years as scientific research is conducted in a far more global context. As such, our academic programs for advanced degrees are rooted in innovative approaches and research methods. The GSA focuses on broadening horizons by stimulating interdisciplinary and multi-national academic channels. Our programs combine courses and supervisors from several of our own departments as well as other Israeli universities, enabling us to provide a wider range of research angles in many fields. Our activities are also conducted in cooperation with leading European and American Universities, giving our graduate students the opportunity to study both at the University of Haifa and at other universities abroad. The GSA is responsible for and supervises all aspects of the University of Haifa’s master’s and doctorate (PhD) academic curricula, and post-doctoral studies.

Master’s studies: Our master’s students are provided with tools to expand their knowledge in a specific theoretical or applied area of study, and to acquire skills in higher-level thinking, analysis, critical evaluation, and professional application. The GSA places an emphasis on research tracks where the students complete a thesis as part of their degrees.

Doctoral studies: Doctoral studies are among the highest levels of academic pursuit. As such, students in our doctoral program are expected to make a substantive contribution to the advancement of knowledge with a scientific dissertation. The GSA places an emphasis on designing and implementing original and independent research.

Post-doctoral studies: Each year the University of Haifa hosts post-doctoral students from a wide range of research fields from Israel and abroad, to pursue additional research, training and teaching. Post-doctoral students are regarded as valuable sources for advancing knowledge and research mobility, bringing to the University of Haifa their accumulated research background from their home university, while acquiring new methodological tools and research agendas. The GSA assists post-doctoral students in becoming acquainted with the University of Haifa’s administrative procedures and post-doctoral fellowships from a variety of funds.

Scholarships: The GSA is responsible for administering a range of scholarships that are available for its graduate students, based on both internal and external financing. Scholarships are granted following meticulous examination of the candidates’ academic standing, entry criteria, and financial status. The goal of the graduate scholarship program is to aid in building and sustaining an inclusive graduate community at the University of Haifa — a community which enhances the quality of the intellectual environment for all of our students and faculty.
The Research Authority at the University of Haifa supports excellence in scientific research. We help foster the next generation of scholars and scientists at our University’s various faculties and departments and through the research centers and laboratories they are affiliated with. Similarly, we encourage research cooperation with other academic institutions in Israel and abroad.

Our top priority is creating access to research funding. We provide our faculty members with the optimal means and services to help them win research grants, and facilitate all of the logistical and administrative aspects involved in conducting successful research. The Research Authority manages the administration and budgets for all of the University’s research centers and institutes, and oversees the establishment of new centers.

Cutting-edge research venues are divided over 47 research centers and institutes and 93 laboratories, leading the field in affective neuroscience, marine sciences, evolution, ecology and environment, education, advanced computer science, crime, law and society, and child development, and other emerging fields of research.

The knowledge I gained during my coursework, provided me with a variety of opportunities in Boston, including offers for post-doctoral and research positions at Harvard School of Public Health and Harvard Medical School.”

Sofi Rosen, PhD Biostatistics
The Office of the Dean of Students coordinates all matters concerning student affairs and welfare, as well as public activities on campus. It plays a leading role in advancing the University’s mission of teaching, research, and service by promoting three goals:

• Supporting the academic foundations of student learning and development

• Promoting a public forum in which students from throughout Israeli society participate together in a common civic discourse that is shared with a growing number of international students

• Cultivating capacities for leadership through opportunities for students to become involved in campus life and Israeli society

“I’ve gotten to experience the amazing city of Haifa and land of Israel in ways that most individuals will never have the opportunity to do.”

Jael Espinoza, USA, Study Abroad and Internship
The Younes & Soraya Nazarian Library

The Younes & Soraya Nazarian Library is the largest Academic central library in Israel, serving the entire university community’s research, learning, and instructional needs.

It has built a longstanding reputation among academic and professional communities in Israel and abroad.

The library is known for the quality and richness of its collections, for its rare books and manuscripts, its extensive range of services, advanced information technologies, and especially for its attentive staff.

The library’s collection comprises over 2.5 million books, journals and other various electronic and digital resources, and provides access to a wide selection of the world’s leading databases.

The library initiates and focuses on the development, digitization and preservation of special collections, such as dissertations, journals, historical photographs of the Land of Israel, and archives of Israeli theater and performing arts.

National Projects

Index to Hebrew Periodicals (IHP):
An in-house production of a unique multidisciplinary database that enables users to search for references to hundreds of thousands of academic, business and popular articles published in selected Hebrew journals, collections and newspapers.

Hebrew electronic journals collection @ JSTOR:

For over 30 years, the Hecht Museum has been the only archeological museum in Israel situated at a university campus. It offers a rich and unique collection of archaeological findings from the Land of Israel and an exclusive art collection.

The museum’s exhibitions enhance research and academic study. Currently we have exceeded 80,000 visitors annually, among them young school students and university students, realizing Dr. Hecht’s dream to connect the young generation to our history and legacy.
2017 Honorary Doctorate Conferees

The University of Haifa awards the degree of Doctor of Philosophy, Honoris Causa, to individuals who light the way with outstanding contributions to society, the University, the City of Haifa, academic excellence, or scientific accomplishment.

Former President of the Supreme Court of Israel Aharon Barak, Former British Prime Minister Tony Blair, Honorary Chairman Leon H. Charney, Prof. Aaron Ciechanover, Former President of South Africa Frederik Willem de Klerk, Baroness Ariane de Rothschild, Former UN Secretary-General Boutros Boutros-Ghali, Prof. Avraham Hershko, Israeli Supreme Court Justice Salim Joubran, Former US Secretary of State Henry Kissinger, Younes Nazarian, The State of Israel’s 8th President Shimon Peres, Prime Minister of Israel Yitzhak Rabin, Shira and Jay Ruderman, Lily Safra, Sami Sagol, Prof. Dan Shechtman, Spiritual leader of the Druze community in Israel Shaykh Mowafak Tarif, and many others.

---

Carmel-Haifa University Economic Corporation Ltd

Carmel-Haifa University Economic Corporation Ltd managed by Ms. Elka Nir serves as the commercialization and business arm of the University and is responsible for protecting and commercializing its intellectual property. Carmel collaborates with various partners and establishes ventures and funds with the goal of maximizing the business potential of commercializing research and knowledge developed at the University. Carmel has increased very significantly the amount raised for research and for spin off companies in the last years.

Carmel has established the Carmel Innovation Fund, based on investments of private investors. The fund provides seed funding to companies established by Carmel based on innovative projects.

To date, Carmel Innovations has invested in six successful companies, Carmel succeeded, in a very short time, to sign very significant strategic agreements and to raise large amounts of additional investments from global partners like J&J, Takada, Merck Ventures and others for several companies.

Carmel has also significant collaborations with partners in China.

Extensions & Special Programs

The University of Haifa is the academic home for the Israel Defense Forces (IDF).

Programs in cooperation with the IDF:
MA Program for Senior IDF Officers
BA for the Intelligence Corps
BA for Naval Officers
BA for the Tactical Command Academy

The ETGAR (Challenge) Project:
BSc program for talented high school students in the Department of Computer Science

Pre-Academic Unit:
The University of Haifa enables students who have not yet met the admissions standard for higher academic studies to take courses to close the gap and enroll in universities and colleges. Courses include evening sessions for working students, a “30+” course for students 30 years old and above, a course for people with learning disabilities, and more.

Israel Prize Laureates among University Faculty

Prof. David Navon, Department of Psychology, 1992
Prof. Arik Shapira, School of the Arts, 1994
Prof. Abraham B. Yehoshua, Department of Hebrew & Comparative Literature, 1995
Prof. Nathan Zach, Department of Hebrew & Comparative Literature, 1995
Prof. Myriam Yardeni, Department of General History, 1999
Prof. Meir Wieseltier, Department of Hebrew & Comparative Literature, 2000
Prof. Asher Koriat, Department of Psychology, 2002
Prof. Miriam Ben Peretz, Faculty of Education, 2004
Prof. Gavriel Salomon, Faculty of Education, 2001

Commitment to the Community

Academic Leadership in the Druze Community - Office of the Dean of Students
Ambassadors Online - The Elizabeth and Tony Comper Interdisciplinary Center for The Study of Antisemitism and Racism
Interdisciplinary Clinical Center - Faculty of Social Welfare and Health Sciences
Interdisciplinary Flagship Project: Promoting Solidarity, Facing Social Exclusion - Faculty of Social Welfare and Health Sciences
Jewish-Arab Community Leadership Program - Office of the Dean of Students
Legal Clinics of Law and Social Change - Faculty of Law
Model United Nations - The Student Union

Academic Leadership in the Druze Community
With the support of our friends, the Program for Academic Leadership in the Druze Community is cultivating a new cadre of educated leaders in the Druze community. Program participants study in prestigious University departments and tracks, including the Department of Education, the Faculty of Social Welfare and Health Sciences, and the Faculty of Law. The courses equip students with advanced academic skills as an engine for social growth. The program’s elite and educated graduates will be able to motivate and lead their community by filling positions in fields that require university educated professionals.

Ambassadors Online
The Ambassadors Online program trains students to be unofficial “ambassadors” for Israel on the Internet. Students learn how to confront the delegitimization of Israel that is present on the Internet, and specifically on social networks. They learn response strategies for different situations and how to represent Israeli community members in community action projects. The project involves academic faculty members, students, and administrative staff.

Interdisciplinary Clinical Center
The Interdisciplinary Clinical Center (ICC) provides diagnosis and treatment services in the areas of physical and mental health from an interdisciplinary perspective. The clinical work combines student instruction, treatment, counseling and research, emphasizing interaction between practice and applied research. Projects initiated by the ICC incorporate therapists alongside faculty members.

Interdisciplinary “Flagship” Project: Promoting Solidarity, Facing Social Exclusion
This multidisciplinary initiative aims to promote social solidarity and change in the approach to marginalized populations. The project combines teaching, academic research, and social activism in the community to empower weaker populations in Haifa and the North, by encouraging the integration of at the same time an active social change agent, promoting change in society at large.

Model United Nations
The University of Haifa Model United Nations (HaiMUN) Society is an extracurricular program where students learn about diplomacy and negotiations through role playing as delegates to the United Nations and simulating UN committees. HaiMUN participates in national and international conferences where the University of Haifa’s delegations have achieved many awards and accolades. The University of Haifa’s Model UN Society also includes a unique academic program, offered under the direction of Dr. Carmela Lutmer and Prof. Michael Gross of the School of Political Sciences, which provides students access to some of the University’s best lecturers in fields ranging from political science and economics to law and conflict resolution.
