

Donors Garden

Recognizing and Honoring the Generosity of our Lead Donors

For visualization purposes only

The University of Haifa is deeply appreciative of our friends and supporters whose generosity has helped to provide the best education for our students, build state-of the art facilities and advance science research for the benefit of humanity.

For more than 40 years, the unwavering support of our donors has propelled the University of Haifa forward and continuing to build an even better Israeli society for future generations.

We are proud to acknowledge the support of our donors. **The new Donors Garden** will give the University of Haifa a public space to honor this distinguished group of donors and inscribe their names in perpetuity.

Located centrally on campus, the Donors Garden will be landscaped with beautiful greenery and aromatic flowers. The garden will be a fitting tribute to those individuals who enabled us to continue to realize our vision of academic excellence combined with social responsibility.

The University of Haifa stands at the threshold of a challenging and exciting future. Philanthropic gifts help us achieve our ambitious academic and social agenda that is so vital to the future of Israel and all who live here.
